

SYED HASSAN ALI

Software Engineer

SUMMARY

Results-driven Software Engineer with 4+ years of experience building scalable enterprise applications, high-performance APIs, and cloud-integrated systems. Expertise in ASP.NET Core, Blazor, Web APIs, SQL Server, and SharePoint (SPFx with React, PnP, REST APIs). Strong background in system design, code architecture, and performance optimization, including handling large-scale SharePoint list data beyond threshold limits. Experienced in delivering enterprise-grade solutions for high-volume environments, with deep knowledge of modern frontend-backend integration, Graph API, and distributed systems.

TECHNICAL SKILLS

- **Backend:** ASP.NET Core, Web API, Blazor (WASM/Server/MAUI), MVC
 - **Frontend:** HTML5, CSS3 (Tailwind, Bootstrap), JavaScript, jQuery, AJAX, React
 - **Databases:** SQL Server, MySQL
 - **Cloud & DevOps:** Azure, Azure DevOps, GitHub
 - **Architecture:** REST APIs, MVC, MVVM, Caching (Redis), SignalR
 - **Other:** SharePoint SPFx (React), Power Automate, Dataverse
-

PROFESSIONAL EXPERIENCE

Software Engineer – Sepia Solutions | Nov 2022 – Present

- Worked on backend components for a location-based e-commerce marketplace using ASP.NET Core, implementing OAuth (Google/Apple), geo-based search (Google APIs), payment integration (Square), real-time chat (SignalR), and financial/disbursement systems for buyers and sellers
- Built and delivered enterprise-grade SharePoint (SPFx React) solutions, handling large-scale data (list threshold) challenges and integrating PnP JS, REST APIs, Microsoft Graph, and Power Automate, while contributing to system design and scalable code architecture

Freelancer – Fiverr | May 2024 – Present

- Worked as an end-to-end full-stack .NET solutions for international clients, developing scalable backend services and responsive front-end applications across multiple modules

.NET Developer – JobMoon (Remote) | Oct 2024 – Jun 2025

- Built and integrated backend APIs for a scalable ASP.NET Core job portal, implementing MSAL/OAuth authentication, supporting candidate/admin portals, and contributing to the intelligent candidate-job matching system, while ensuring seamless frontend integration and reporting to the CTO.

Full Stack Developer (Freelance) – Softmesh Solutions | Aug 2021 – Nov 2022

- Created multiple end-to-end web applications using .NET Core, PHP, and MySQL, building responsive frontends and robust backend systems including custom business applications and CMS-based solutions

Internee Developer – Silverttech Solutions | Apr 2021 – Jul 2021

- Assisted in development and maintenance of web applications using .NET and PHP, improving code quality, functionality, and system reliability
-

KEY PROJECTS

Loci Marketplace (Location-Based E-Commerce Platform)

- Engineered a scalable backend for a location-based marketplace using ASP.NET Core, implementing secure Google and Apple OAuth authentication, nearby search with Google Maps/Places APIs, Square payment integration, real-time SignalR chat, and financial modules for buyers, sellers, and admin to handle transactions, balances, and settlements.

Enterprise SharePoint Solutions (SPFx Ecosystem)

- Designed and delivered multiple enterprise-grade SPFx (React) applications, including Invoice Management Portal, Delegation System, Promo Portal, and Task Tracker, implementing cross-application delegation, optimized large-list handling, PnP JS, SharePoint REST & Microsoft Graph integrations, Power Automate workflows, and scalable reusable code architecture for multi-application environments.

SpaceFinder (Real-Time Location & Reservation Platform)

- Built a location-based hotel and rest-space booking platform using ASP.NET Core and Blazor, implementing Google API geo-search with latitude/longitude filtering, real-time SignalR chat and booking system, enabling dynamic discovery, communication, and reservations.

Company Quotation Manager (Enterprise Management System)

- Designed and developed a full-scale ERP-like system for a chemical company using ASP.NET Core MVC and SQL Server, building modules for inventory, quotations, customer and employee management, implementing dynamic RDLC-based quotation generation with automated calculations, RO/Boiler/CWT testing reports, and integrated document export via RDLC and jsPDF.

Abracadabra API Testing Tool

- Core backend developer for Abracadabra, a Postman-like API testing platform built with ASP.NET Core MVC and SQL Server, implementing API request handling, JSON response parsing, test execution, AI-driven automated test case generation, and secure user authentication via ASP.NET Identity

EDUCATION

- Bachelor of Software Engineering – Iqra University (2018 – 2022)
- HSC Pre-Engineering – Government Degree College (2016 – 2018)
